Profile

Final-year Computer Engineering student at Bina Nusantara University specializing in cross-platform mobile application development using Flutter. Experienced in building production-ready Android and iOS applications, integrating REST APIs, real-time data, and cloud services. Strong background in developing clean and maintainable architectures, implementing state management (Bloc, GetX), and designing user-focused features such as notifications, dashboards, and real-time monitoring. Proven ability to collaborate in agile teams and deliver scalable mobile solutions that integrate seamlessly with IoT devices and backend systems.

Education

Bina Nusantara University

2022 - Present

Bachelor of Computer Engineering – GPA 3.26

Achievements:

- Finalist Gemastik 2025
- Top 50 APAC Teams - Google Solution Challenge 2025
- Special Winner 2024 - Binus IoT Expo
- Best Microcontroller Final Project

Experience

Zegen Solusi Mandiri

Feb 2025 – Jul 2025

Mobile Programmer | Internship

- Developed and maintained 2+ cross-platform mobile applications for Android and iOS using Flutter.
- Implemented 10+ features and bug fixes across multiple sprints, improving app stability and performance.
- Collaborated with cross-functional team members to ensure on-time delivery of features and fixes.

Projects

Smart Medicine Dispenser → Minder | Full Stack Developer

[🔗 GitHub Link](#)

Smart Medicine Dispenser is the initial prototype, later evolved into Minder, an improved and more scalable version with enhanced backend architecture, monitoring features, and user experience.

- Technologies used: Flutter, Gin, Azure, ESP32, Arduino, FCM, RESTful API, MQTT.
- Designed and developed a mobile application integrated with IoT hardware and cloud backend for automated medicine dispensing.

- Implemented real-time MQTT communication between the mobile app, server, and ESP32 device.
- Developed automated dosage scheduling and control features within the mobile application.
- Enhanced the system into Minder by improving:
 - Backend architecture (migrated from Laravel to Gin/Go for better performance and scalability)
 - User monitoring features, enabling caregivers to track relatives' medication adherence
 - Notification system, delivering scheduled and alert-based reminders via Firebase Cloud Messaging
- Developed system with 5+ core features including scheduling, dispensing, monitoring, and notifications.

Organization Experience

Bina Nusantara English Club (BNEC)

Manager of Information Technology | BNEC Presidency 2024

- Maintained and updated BNEC's official website and digital platforms.
- Designed and delivered web development training for internal staff.
- Provided technical support for organizational activities and events.

Vice Project Operational | New Member Recruitment 2023

- Led 2 divisions in planning and executing large-scale recruitment events.
- Coordinated operations for multiple activities including Counseling Class, UKM Expo, Comprehensive Presentation, and Welcoming Party.
- Implemented a seamless digital registration process for new members.

Technical Skills

Framework: Flutter, Laravel, Arduino, Qt

Languages: Dart, PHP, C/C++

Hardware & Embedded: ATmega328P, ESP32

3D Design: Fusion 360

Tools & Other: Git, REST API, Firebase, Bloc, Getx

Soft Skills

Strong communication and teamwork

Time management and adaptability

Leadership and initiative in team settings
